

PROJECT CASE STUDY

Simple stainless steel handrails are both practical and visually pleasing.

Effective protection for Juliet balconies in the student accommodation.

Proof that not all our gates are highly sophisticated and automatic!

Fencing, bollards, handrails and balcony protection for student accommodation at Aberystwyth University

Client

Balfour Beatty Costain

Location of project

Aberystwyth, Wales

Project overview

An interesting project which entailed a wide range of different bespoke products including stainless steel railings, post and rail fencing, timber gates, bollards, and protection for Juliet balconies. All of these products were also manufactured by us.

Project notes

A good example of how versatile we are, and both in what we're able to manufacture and go on to install.

Client feedback

"We are very happy with the work that has been carried out by Procter, and they helped us to achieve a handover date that didn't seem possible."
