

Pro-sure Fencing

PCD17

The mesh is a 75 x 12.5 x 4mm fabric (commonly termed 358 mesh) and these very small apertures mean it's not possible to get a finger or toe hold for climbing, or get access with a cutting tool. A range of heights is available of up to 6 meters, posts are hollow steel sections with the mesh overlapped and secured with full length clamp bars and security fixings. Finish in a wide range of standard RAL colours. Non-standard colours are also available.

Pro-sure is for high security applications, though is often used for lower security applications for peace of mind.

Matching Swing Gates or Sliding Gates can be supplied.

Applications

Perimeter
Utilities
Warehousing
Airports
Retail
Industrial Units
